

Navigating the CP-CTNet DMACC Public Website and Portal Gateway

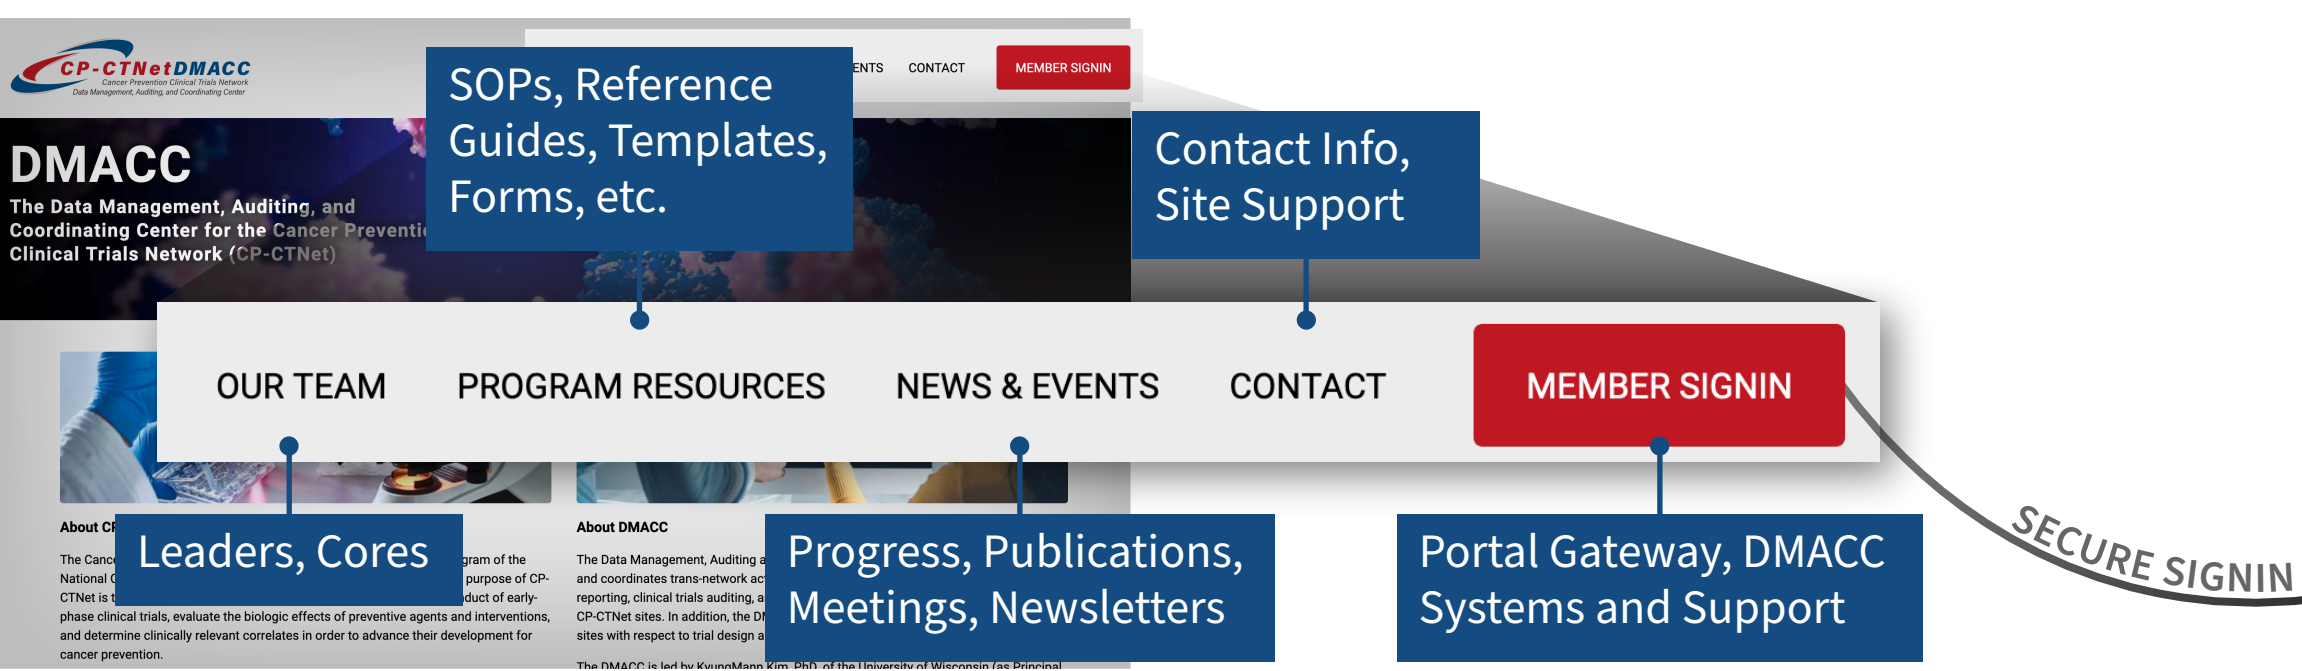

Alex Krolikowski,¹ David Goss,² Lynette Blacher,¹ Robert Starkweather,¹ Leslie Mundy,¹ and Suzanne Siminski¹
¹Cancer Prevention Clinical Trials Network Data Management, Auditing, and Coordinating Center at Frontier Science Foundation, ²Frontier Science Foundation

The **CP-CTNet DMACC website** provides an innovative one-stop shop for CP-CTNet researchers to access a variety of systems and resources to support their work. It provides secure access to all project data management operations and systems, site activities and the CP-CTNet Central Database where all project data can be viewed in one location. The CP-CTNet DMACC website is divided into two access areas: the public section and the member section (Portal Gateway). The CP-CTNet DMACC website may be accessed at CP-CTNet-DMACC.org

DMACC Public Website

The DMACC Public Website contains generally available information about the project (e.g., its progress, publications, leaders, cores, meetings, resources, etc.). It serves as the face of CP-CTNet to the public and provides administrative information and support to collaborators, such as email lists, team reports, document retrieval facilities and links to other websites related to the CP-CTNet Program.

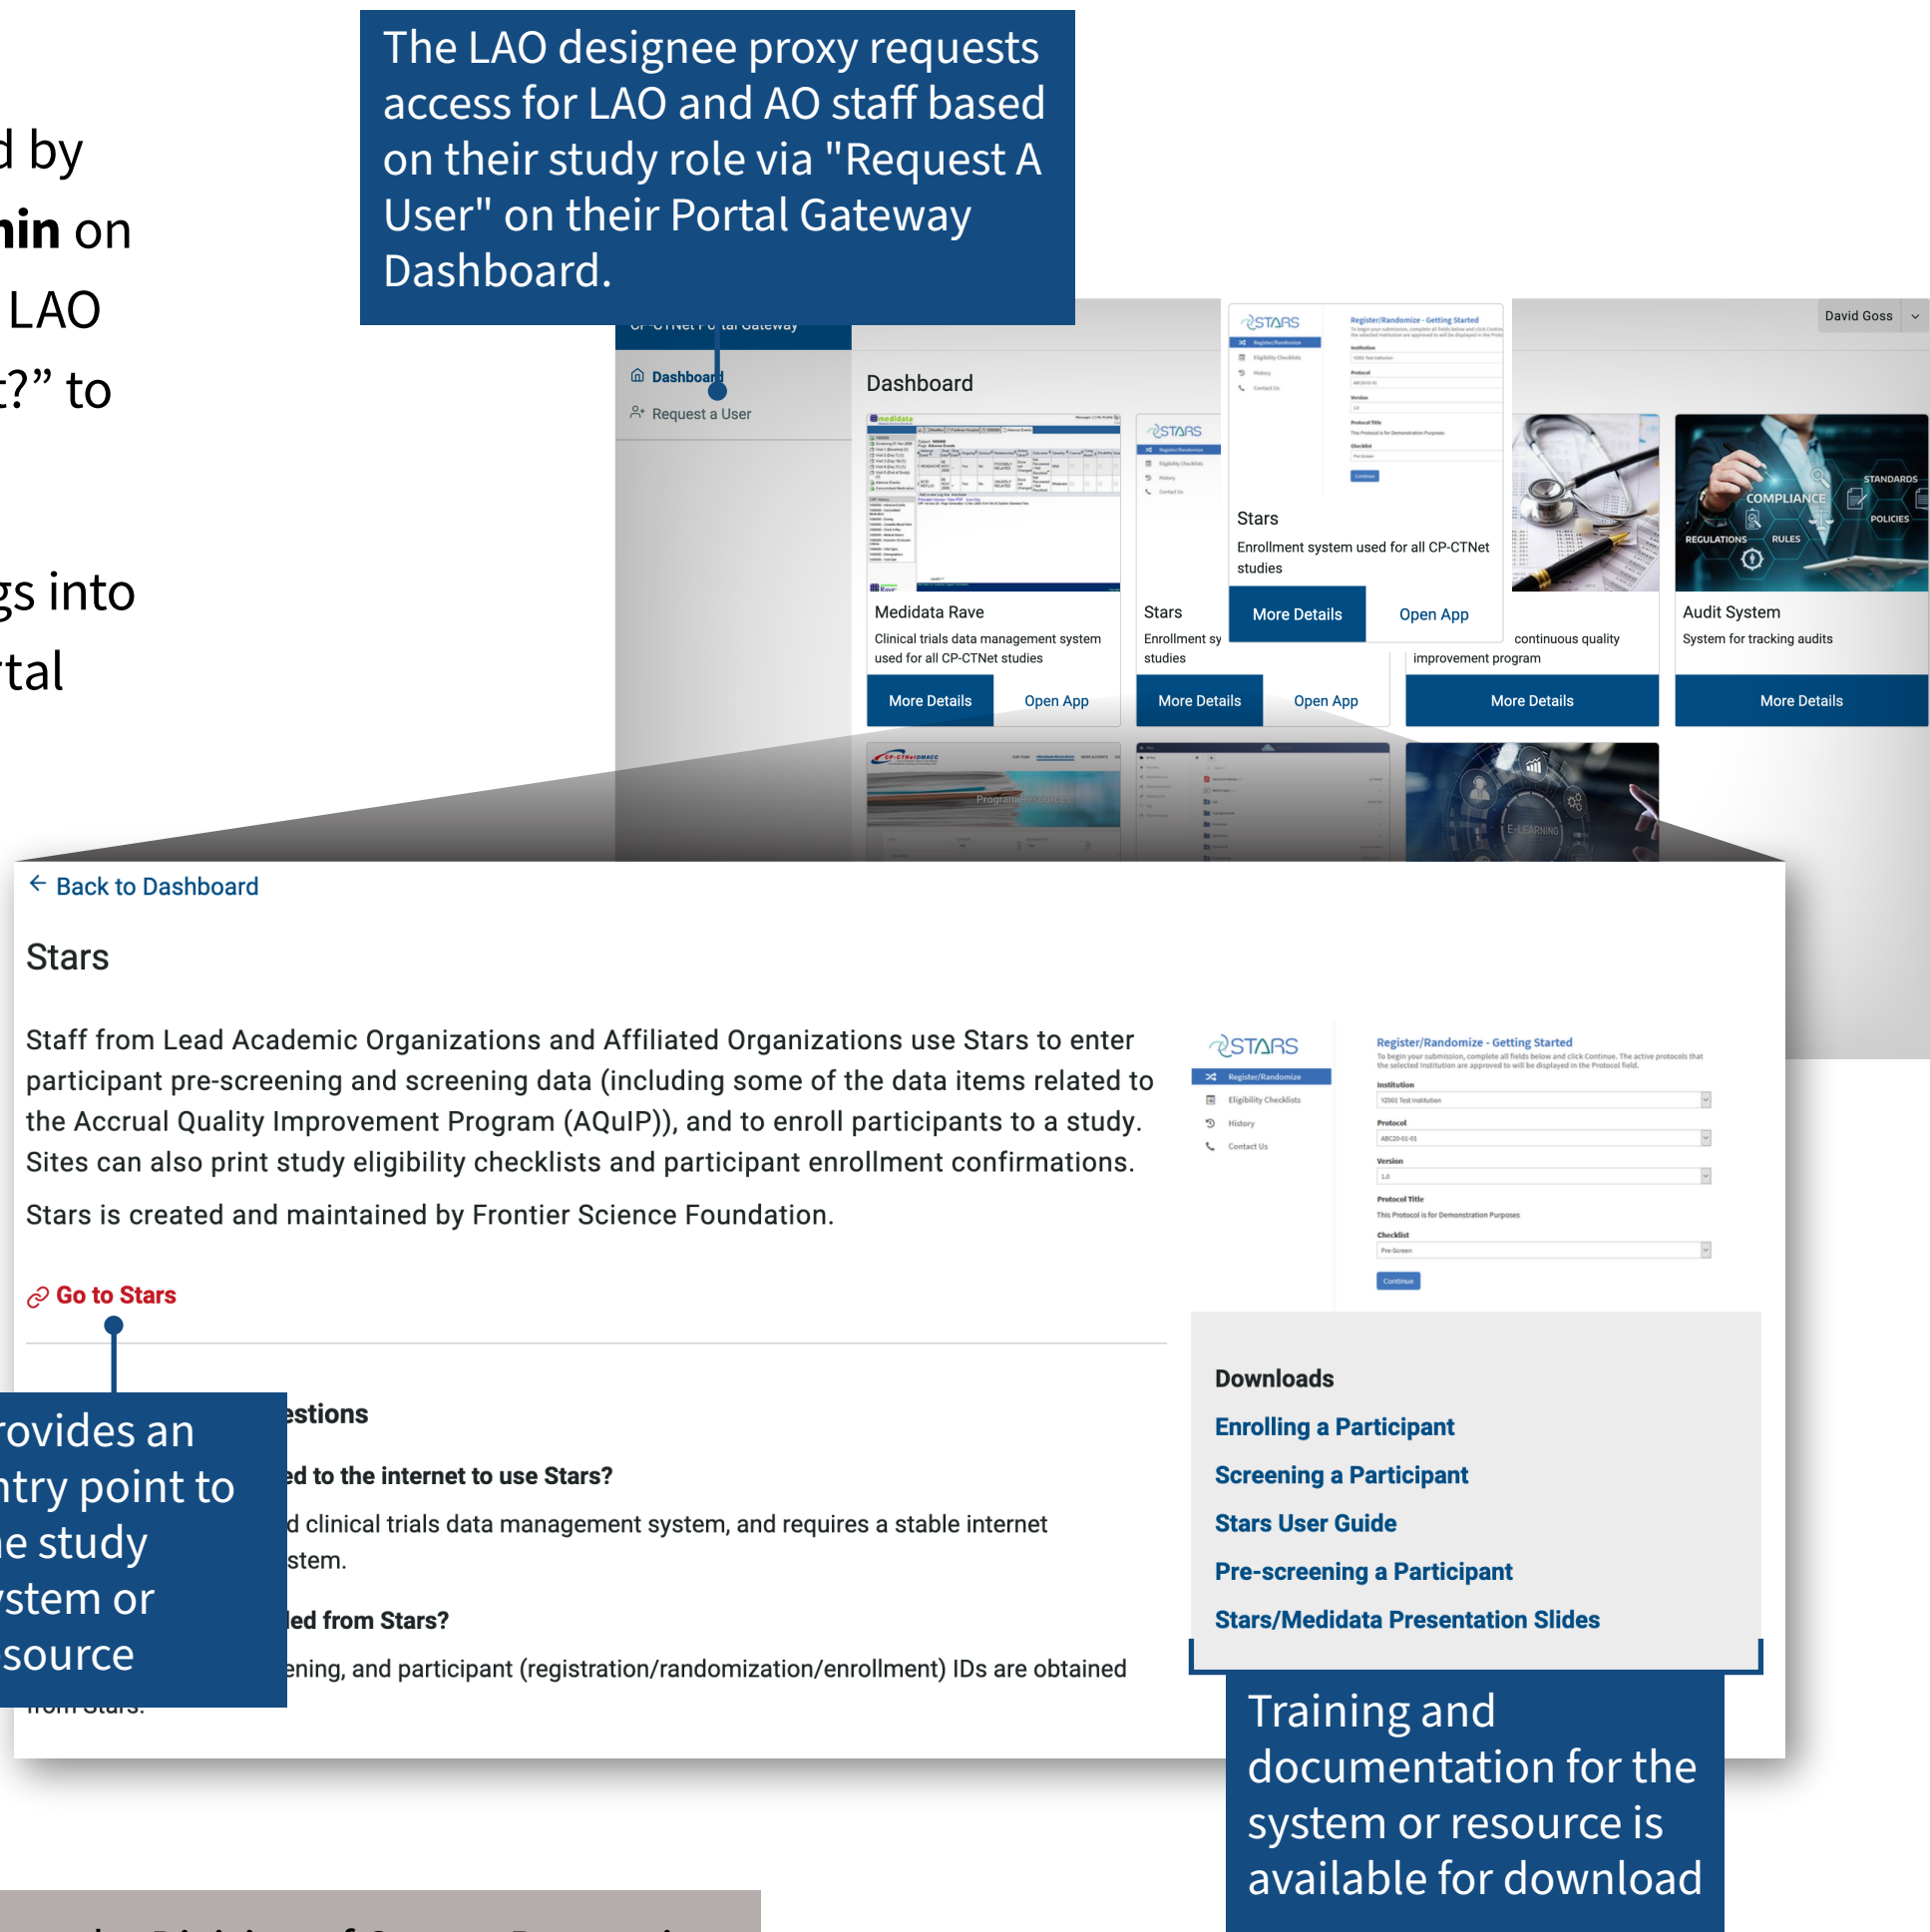

Portal Gateway

The Portal Gateway provides an entry point to access web-based resources and systems built for CP-CTNet. It provides member-only access to the Portal Gateway Dashboard, which houses a wide variety of programs and tools for facilitating the progress of CP-CTNet, such as program resources, entry points and support for study systems, training materials, secure access into the CP-CTNet Central Database via Medidata Rave, etc.

Portal Gateway access is requested by the LAO designee via **Member Signin** on the CP-CTNet DMACC website. The LAO designee selects “Need an account?” to request access.

After access is granted, the user logs into the Portal Gateway to view the Portal Gateway Dashboard.

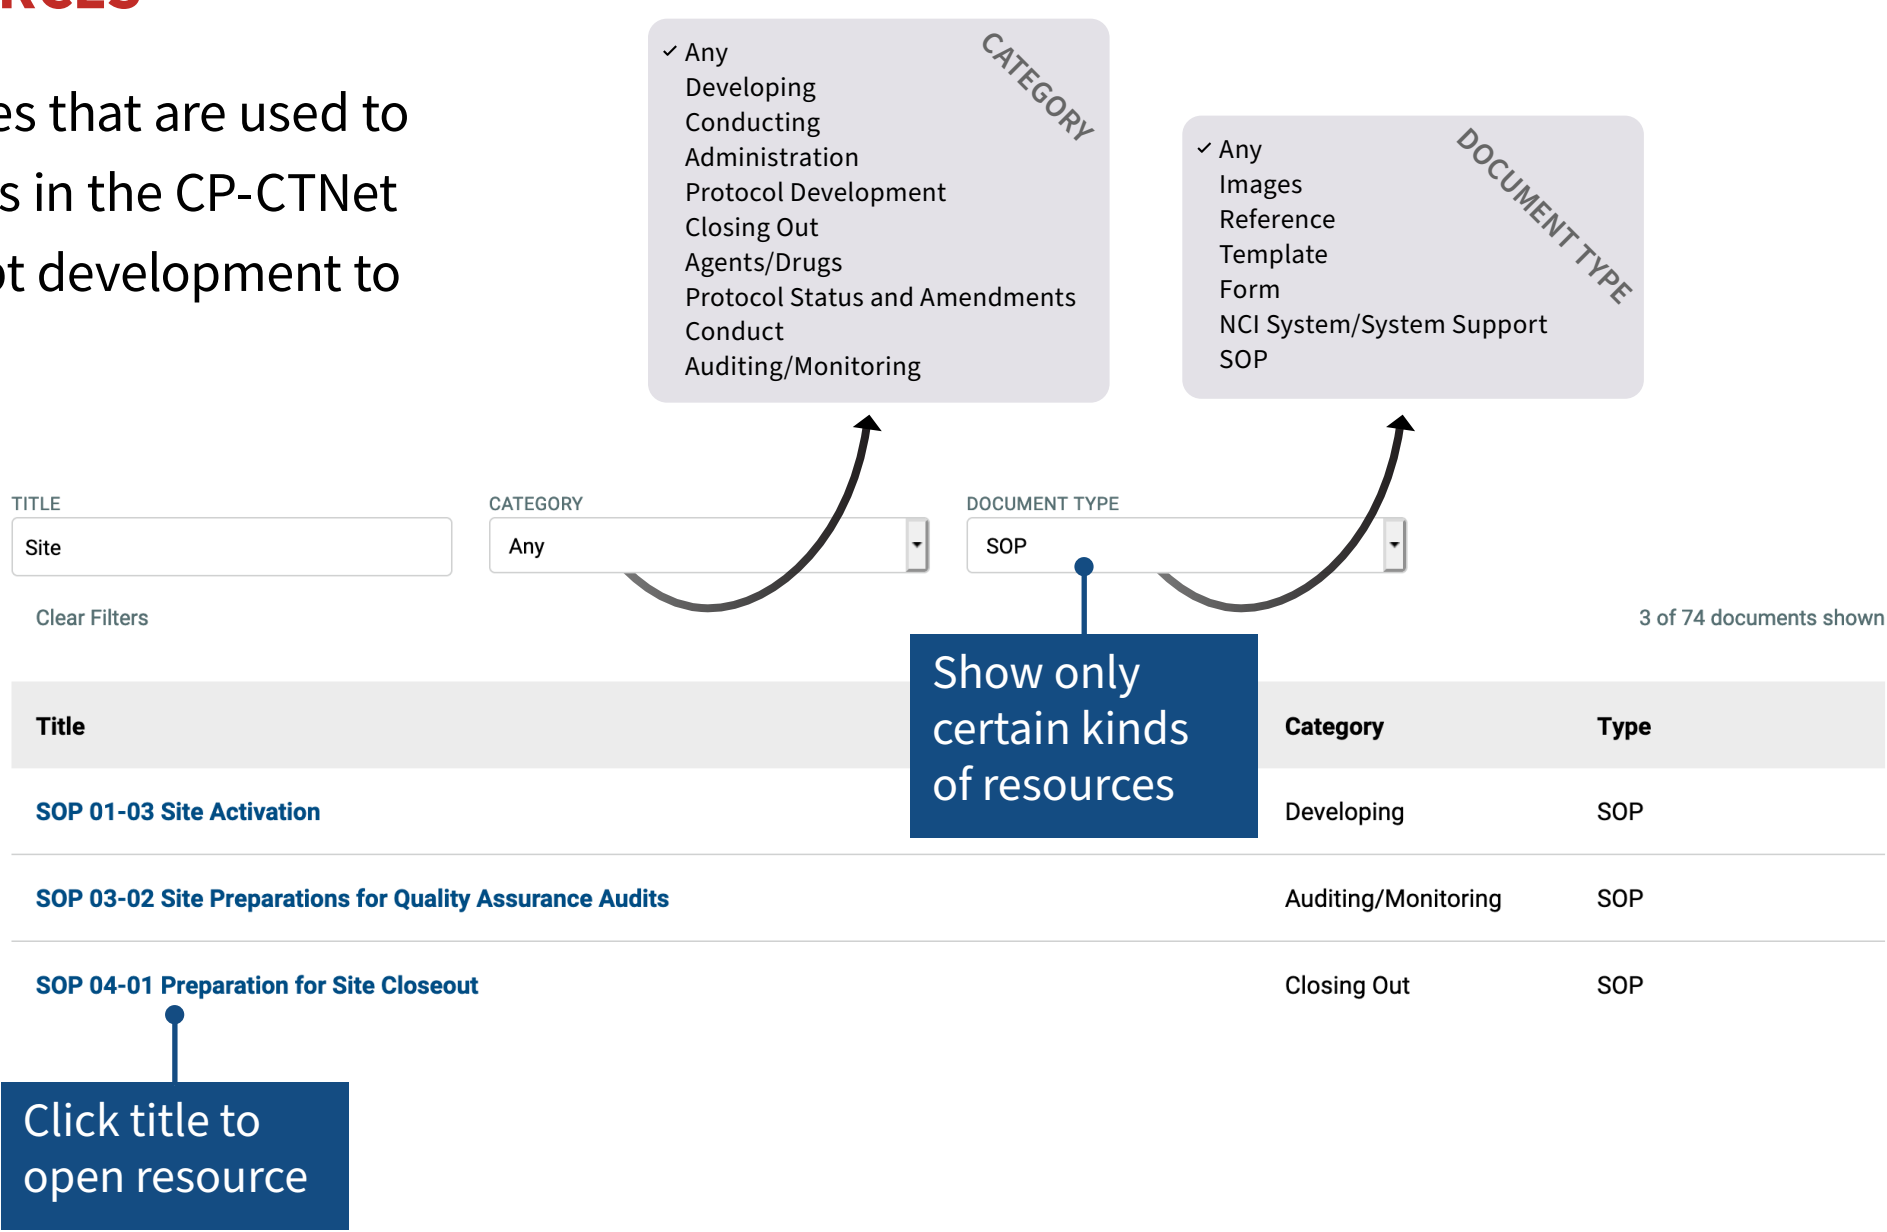

The LAO designee proxy requests access for LAO and AO staff based on their study role via "Request A User" on their Portal Gateway Dashboard.

PROGRAM RESOURCES

Access study resources that are used to support LAOs and AOs in the CP-CTNet Program from concept development to study close-out.

Tip: Use filters to search by title, category or type of document.

Each Dashboard tile provides a link to a study system or resource, including:

1. Medidata Rave
2. Stars
3. AQuIP
4. Audit System
5. Document Library (Program Resources)
6. ownCloud
7. Virtual Training

Acknowledgments: We would like to thank our collaborators at the Division of Cancer Prevention for their continued support and guidance. We would also like to thank our DMACC partners in the Department of Biostatistics and Medical Informatics at the University of Wisconsin who play a key role in administration and coordination of the DMACC portal gateway activities.
