NCI Cohort Consortium Project Hub

The NCI Cohort Consortium Project Hub is a searchable data management system designed for two main purposes:

1. To track and report on the activities of NCI Cohort Consortium projects and project groups in an efficient manner.
2. To automate the proposal process for new NCI Cohort Consortium projects, including the electronic submission, review, tracking, and reporting of project proposals.

The website includes:

- A list of active and completed consortium projects / project groups, including details for each project
- A list of approved proposals for NCI Cohort Consortium projects, including details for each project
- Data sharing and publications policies and processes of consortium projects / project groups
- Peer-reviewed journal articles by NCI Cohort Consortium projects/groups
- Annual progress reports and updates from projects / project groups
- A list of cohorts participating in the different projects / project groups

Website users can perform the following actions:

The Project Hub is a searchable database management system designed to track activities of NCI Cohort Consortium projects and project groups, and to automate the proposal process for new consortium projects and electronic submission of annual progress reports by project group leaders. Users can browse / search approved consortium proposals, run / create reports based on specific search criteria, submit new project proposals, update project related information electronically.

The Project Hub is expected to launch by the end of the year. Any feedback and questions can be emailed to Camille Pottinger at NCICohortConsortium@mail.nih.gov.

- [If you'd like to view the Project Hub beta website, a request for access can be emailed to stephensonp@imsweb.com.](mailto:stephensonp@imsweb.com)
