Data Sprint Extension

Step 1

Identify the high-value research questions that may be asked of the standardized RWD/RWE generated by participants through EOM

Step 2

Supplement the existing data elements with new ones to extend and enhance the ability to conduct scientific clinical and research inquiries with comprehensive real-world datasets

Step 3

Support piloting the implementation of data elements in coordination with ONC, NCI, and CMMI, along with health IT vendors, health systems, payors, life science companies, and data research platforms.

The reignited
Cancer Moonshot
has ambitious goals...

Reduce the # of deaths from cancer by 50%

Improve the experience of people and their families living with & surviving cancer

CancerX is responding to the call...

- Announced by the White House on February 3, 2023.
- A public-private partnership to boost innovation in the fight against cancer.
- Co-hosted by the <u>Moffitt Cancer</u>
 <u>Center</u> and <u>Digital Medicine Society</u>
 (<u>DiMe</u>), alongside ONC and OASH.
- Convenes the many diverse stakeholders needed to unleash the power of innovation to create a future free of the burden of cancer.
